## **Using Sample Contracts**

A clear contract is key in any successful business transaction. However, prior to using any sample contract there are two important points you should consider:

A "sample" contract is a generic document. It is easy to copy the contract verbatim thinking it will cover all your needs however, in many cases it may not be adequate. You are advised to use a sample contract only as a general guide and it should be customized to suit your specific needs.

Consider using a lawyer to review the contract. Utilizing his experience and expertise is no different than asking the advice of a forest consultant to review different forest management options you may be considering to undertake in your woodlot.
